 **to assemble**

dimension	600 x 2011 x 800 [mm, +/-2]
size	41U
mass	90kg
static load	800kg
color	black

The RACK cabinet is made of thick powder-coated sheet metal, which ensures resistance to rust and paint abrasion it is guarantees good appearance even after years of use. The front door is completed with durable, tempered glass. Through them you can check the operating status of the equipment without opening cabinet. In the ceiling are ventilation holes to which fans can be attached. There is also a plug through which cables can be easily inserted. The side latch walls have built-in plugs for lock installation. Two-section cabinets are an ideal solution when access to the rear panel and cables is often required. Simply open the lock and swing the section with devices to the side - there is no need to unplug anything, slide out the devices or disassemble the cabinet.
