RACKTEL

Shelf

static load: 20kg

mounting accessories included

mounting: side (four-point)

RL-P600S	
external dimensions [mm]	485 x 48 x 350 [+/- 2mm]
size	1U
weight	1,8kg
static load	20kg

Rack shelf is designed for standing cabinets. The presented shelf is made of high-quality sheet metal finished in black. Due to the fact that the sheet is perforated, it provides access to fresh air to the device and allows the removal of heated air, which reduces the risk of failures and loss of system efficiency. The shelf is installed using screws - the shelf has mounting holes allowing for quick and simple installation.
